

# for Refugees and Displaced Persons

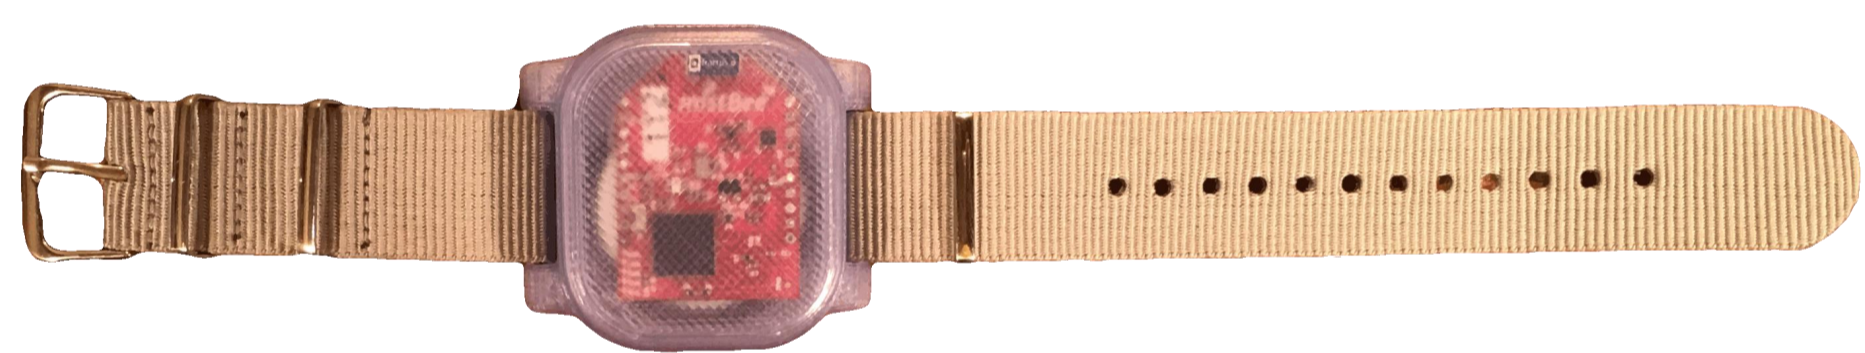

## Monitoring, Assistance Alerting, Location Awareness

- Using mist® mesh network position beacons and a wearable mistBit™, in a refugee camp and temporary shelters to combat Sexual and Gender-Based Violence & Human Trafficking against women and minors; can have a low-cost, reliable way to request **Immediate Assistance**.
- **Position Beacons** provide the location of the Alerting Party. Coordinates fed to a drone can quickly provide video of the scene as well as who else is in the vicinity.
- Applies to retention facilities, refugee camps and training environments.

12-Month Battery Life

mistBit™ provides an **immediate alert message** via a double-tap.  
**Temperature** can also be monitored.
